Assembled View

Assemble the 12 items together as shown without tightening down any screws. Lay the loose assembly down on a flat surface.

Exact locations of the brackets do not matter yet.

The short red extrusions are for squaring the frame and will be removed later.

A

A

ITEM NO.	DESCRIPTION	QTY.
1	583mm TSlot Extrusion	2
2	Inside corner bracket	8
3	75mm Temporary TSlot Extrusion for Squaring	2

Assuming your 389mm TSlot Extrusions were cut to identical lengths, your frame should now be square!

ITEM NO.	DESCRIPTION	QTY.
1	389mm TSlot Extrusion	2
2	583mm TSlot Extrusion with brackets installed	2

	SCALE: 1:5	SHEET 4 OF 10

Like before, assemble the entire lower frame without fastening down any set screws.

ITEM NO.	DESCRIPTION	QTY.
1	389mm TSlot Extrusion	4
2	583mm TSlot Extrusion	2
3	Inside corner bracket	18

Join the prior frame with the loose frame "back-to-back" such that the dangling corner brackets do not interfere with each other. Then install the 8 plate assemblies into the corner and tighten them down such that the frame is "pulled" into the shape by the frame from the prior step.

Note: This process is made easier by dangling the frame over a table such that the corner brackets do not prevent the frame from resting flat on the table surface.

Clamp down the outer frame with the temporary red plates as shown below. This step will pull the lower frame into a configuration that matches the upper frame.

Then clamp down the setscrews in the outer frame extrusions. (The inner extrusions will be clamped down later.)

Now tighten down the setscrews in the outer frame extrusions on the frame that is still loose. (The inner extrusions will be clamped down later.)

With the outer screws tightened on the lower frame, remove the temporary plates and separate the frames.

B

B

Set this one aside.
